GINGKO AUDIO ClaraVu Dust Covers

Thank you for purchasing the Gingko Audio's ClaraVu™ dust cover. The following tips will help you get the most enjoyment out of your high-quality acrylic cover.

Besides protecting your expensive audio equipment from dust, the ClaraVu cover will also protect it from wandering hands of children, pets, and cleaning personnel. A lot of our customers wished they had bought the ClaraVu cover before their expensive cartridge was destroyed when un-protected by a quality cover. The ClaraVu cover also features your expensive equipment as if it is displayed under a museum case. We get a lot of accolades from customers who receive compliments on how their turntable or CD player looks fabulous under the ClaraVu.

We pack our fragile dust covers to survive the FedEx and UPS shipping treatment. We use extensive bubble wrap packing and reinforced carton so hopefully your cover has arrived in good shape. Be extra careful in opening the bubble wrap. If you use a box cutter to cut open the tape make sure it does not cut deep enough to scratch the cover. Save the packing material if possible so if you have to ship it later it will be available.

We supply four small silicon feet to put under the cover to prevent scratching the plinth or shelf surface. You may choose to put them on the underside of the cover but another effective way is to put them on the plinth or shelf surface just inside the corners of the cover so that the cover rides on these dots. That way, the cover will not move around to mar the plinth or shelf surface.

If you purchase a matching Cloud 10 or Cloud 11 vibration control platform with the ClaraVu cover, we have beveled the bottom edges of the cover to fit over the beveled top edges of the Cloud. This will make the cover sit flushed on the Cloud, making it an integrated solution that makes your audio system sound and look better.

DO NOT use alcohol or household chemical cleaner like Windex to clean or polish the

ClaraVu cover. This will void the warranty. Over time, these cleaners will craze the acrylic material, making it look un-attractive. We recommend using a good plastic cleaner and scratch remover such as Novus #1, 2 or 3, found at a local Harley-Davidson motorcycle store (used to clean shiny surfaces on motorcycles). Otherwise, just use warm water with a soft cloth to clean the cover.

The Gingko Audio ClaraVu carries a 90-day warranty against manufacturing defects. To register, please complete, detach, and return the bottom of this page to:
