

STYLAST™ STYLUS TREATMENT

Instructions:

1. First clean the stylus thoroughly with **LAST®**, **STYLUS CLEANER**
2. Uncap the **STYLAST™**, **STYLUS TREATMENT** bottle.
3. Using the applicator brush that is built into the cap, gently apply the treatment to the stylus tip. One or two strokes, using a back to front motion is sufficient. Never brush tip/cantilever assembly.

It is only necessary to touch the diamond tip gently. Do NOT use any force or pressure on the Stylus tip/cantilever assembly.

4. If there is a build-up of puffy powder on the stylus tip repeat the above application.
5. Recap the **STYLAST™** bottle to prevent loss or evaporation
6. The stylus is now ready for playing a record.
7. For best performance and longest stylus life, **STYLAST™** should be used prior to every record play

Note: Please keep **STYLAST™** and all other record and stylus care products away from children.
